

It often happens that sports clubs themselves take care of the daily maintenance of artificial turf. We believe that this maintenance branch also needs high-quality material. Quality makes quality! The Tbrush is a triangular brush that can be used for the daily maintenance of your artificial grass pitches. Our simplest brush is built from a high-quality steel frame in combination with complete plastic brushes. These plastic brushes have the great advantage that they do not perish under the influence of water.

The Tbrush is very mobile due to its compact size and relatively low weight. The Tbrush is supplied with transport wheels and a drag chain as standard. This means that this triangular brush can be hung behind a tractor, Gator, Truckster or a Workman. The Tbrush is easy to use and takes up little storage space. This brush should therefore not be missing from your artificial grass sports field!

The Tbrush is suitable for brushing out different types of infill; think, for example, of rubber, sand and cork. Brushing the field regularly prevents reduced drainage, deteriorated sports-technical properties, such as hardening or the appearance of a polluted field. The brushed field regains the appearance it had on the day it was taken into use.

THE WORKER IS KING

Tbrush Specifications:

Type	TB140	TB180
Working width	140 cm / 55"	180 cm / 71"
Dimensions (L x W x H)	120 x 150 x 30 cm / 47 x 59 x 12"	160 x 200 x 30 cm / 63 x 79 x 12"
Weight	40 kg / 88 lbs	70 kg / 154 lbs
Power requirement	10 - 35 hp	15 - 45 hp
Linkage	Drag chain	Drag chain
Operating speed	0 - 8 km/h / 0 - 5 mph*	0 - 8 km/h / 0 - 5 mph*
Functions		
Brushes	The Brush is equipped with high-quality brushes with stiff bristles.	
Comments		
	* The working speed depends entirely on the working depth and the surface.
