

GKB Sandfiller

As a greenkeeper you always strive for perfection. The GKB Sandfiller helps you with that. Every professional who works on a golf course knows that scarifying and sand filling is a golden combination for thinning and keeping the drainage perfect. This usually takes a lot of man hours. The Sandfiller combines scarifying, removal and sand filling in just one pass. By mixing the sand with grass seed, it is also possible to overseed at the same time. This makes the Sandfiller the perfect machine for your golf course!

The Sandfiller works by combining a scarifying machine with a collection bin and a sand bunker. During scarifying, the Sandfiller makes slots of 3 mm wide every 4 cm. The waste is taken away and thrown into the collection container. The trenches are then carefully filled with dried sand. This is done by the hydraulically driven conveyor belt in combination with the stainless steel sand filling unit.

The rollers at the front and back ensure that an even image is created. The depth of the machine can be adjusted by means of the front roller. The collection container of the Sandfiller can be tilted hydraulically, so that it is easy to empty. After editing, the course is immediately ready to play again. This makes the Sandfiller the perfect machine for your golf course!

THE WORKER IS KING

Sandfiller Specifications:

Type	SF120
Working width	120 cm / 47"
Working depth	0 - 4 cm / 0 - 1,6"*
Dimensions (L x W x H)	160 x 165 x 110 cm / 63 x 65 x 43"
Capacity sandbunker	120 l
Capacity container	400 l
Weight	620 kg / 1370 lbs
Power requirement	40 - 60 hp + creeper gear
Pump capacity oil	20 l/min
Max. hydraulic pressure	150 bar
Linkage	Standard three-point hitch cat I - II
Operating speed	0 - 1,5 km/h / 0 - 1 mph**
Comments	
*	The working depth depends entirely on the working speed and the surface.
**	The working speed depends entirely on the working depth and the surface.
