PERVADE

PREMIER INFILTRATION TECHNOLOGY

Pervade is a superior soil penetrant designed to quickly move water through the soil profile, allowing oxygen to move in. It promotes longer-lasting moisture penetration than traditional alcohol- and soap-based wetting agents. **Pervade** is 100% biodegradable, non-burning and compatible with treated water supplies.

ACTIVE INGREDIENTS

Proprietary Blend of Di-sulfosuccinate Surfactants 72.0%
Buffers, Couplers, and Stabilizers Ineffective as Adjuvants..... 28.0%

Net Weight: 1.000 kg/L

PROFESSIONAL USE GUIDELINES ①

APPLICATION:

Apply with any equipment that delivers an even coverage to the targeted area. Ideally, **Pervade** should be watered in within 6-12 hours.

RATE OF APPLICATION:

Apply 2.5-5.0 L/ha every 3-4 weeks as needed.

COMPATIBILITY:

Pervade is compatible with all Floratine soil products. Tank mixing should never be attempted with any other product unless definite compatibility is predetermined by using the standard jar test. For best mixing results, remove tank strainer prior to product addition.
