

The 'finishing touch' is what determines the appearance of your artificial turf field. With the Topfinish you drag all types of artificial grass sports fields, spreading the infill and taking any contamination into the mat structure. The result: a good-looking synthetic turf pitch that you can be proud of. At GKB we are contractors ourselves, which is why we develop and manufacture our machines as we would like them to be. The build quality of the Topfinish proves that we take every machine equally seriously.

The Topfinish is made with a high quality rubber mat. This rigid mat is very wear-resistant and lasts a long time. The Topfinish is therefore not a tool that you quickly write off. The structure of the mat ensures that the infill is evenly distributed over the field. The Topfinish can be hung behind your tractor, Gator, Workman or Truckster by means of the chain.

After towing in your field, the Topfinish is easy to store. The drag mat is easy to roll up and then lift with 1-2 people. The Topfinish takes up almost no storage space! If you need the Topfinish again, it will be ready for the next job in no time! This makes the Topfinish an indispensable tool for your artificial grass sports field!

THE WORKER IS KING

Topfinish Specifications:

Type	TF200
Working width	200 cm / 79"
Dimensions (L x W x H)	250 x 200 x 10 cm / 99 x 79 x 4"
Dimensions during transport (L x W x H)	30 x 200 x 30 cm / 12 x 79 x 12"
Weight	40 kg / 88 lbs
Power requirement	10 - 35 hp
Linkage	Drag chain
Operating speed	0 - 12 km/h / 0 - 7,5 mph*
Comments	
	* The working speed depends entirely on the type and amount of infill and the surface.
