

sisis®

BUILT WITH 90 YEARS EXPERIENCE

Built with 90 Years Experience

For 90 years the world's finest groundsmen, greenkeepers and gardeners have been choosing SISIS, the world's best turf maintenance equipment. The reason more people trust SISIS is that, like our users, we've always refused to compromise on quality. This commitment explains why even today every part of every machine is designed and built with pride in Derbyshire, England, incorporating only the finest materials and assembled by our team of engineers.

Investment in the SISIS brand continues to be at heart of everything we do. State-of-the-art facilities, high productivity manufacturing, training facilities for staff and customers, latest production systems, exhibitions, educational seminars and of course new products, designed on the latest computer software systems.

2022 will see the next generation of SISIS equipment. Battery powered, no compromise alternatives to our petrol machines, with super low CO2 footprint helping everyone towards the carbon neutral goal.

At SISIS we have long understood that service and aftersales must be as superb as the equipment for customers to achieve maximum performance and first class results. Our dealers and distributors, both in the UK and overseas, are trained in installing and maintaining all SISIS products to give you first class service wherever you are.

We hope you enjoy looking through our products and, if at the end you're not certain what makes our machines so different, we ask you give one a try.

Ian Howard – Managing Director

Admired for innovation the WORLD OVER

Our team work harder to offer more support to more customers more of the time – whether at grass roots or with professional users. That's why you'll see our machines on the best pitches, greens and fine lawns around the world.

Solid Engineering with a unique feel...

Our reputation for innovation began in 1932 and has continued ever since. Through our ongoing development of cutting edge ideas our expertise will help the way natural and synthetic playing surfaces are prepared and maintained.

At SISIS every design detail makes a difference to performance. From industry firsts such as the patented contra-rotation principle developed in the 1950's to the more recent Aer-Aid system that's revolutionized the ground care industry, you can be sure engineering innovation runs through every SISIS machine.

"I use the Dart once a month and it gives us great results every time. We have a variety of interchangeable tines which help. It was the first step to improving the health of the green and it has worked wonders."

**Ian Fraser, Head Greenkeeper –
Pitmedden Bowls Club**

"The players have commented that the pitch looks and plays great. At the end of the day my job is to make the pitch better for them and the Quadraplay is helping me to achieve this".

**Lawrence Brown, Grounds Manager –
Ilford Rugby Club**

"Since I have had the Auto-Rotorake MK5 scarifier, I have been absolutely delighted with it. It delivers exactly what I want , it is comfortable to use and has plenty of power to undertake any of our key maintenance tasks."

**Clive Brown, Groundsman –
Bourne Cricket Club**

"Overall it is just a fantastic piece of kit. There has been a big improvement in the greens and our soil samples have proved that the thatch levels have dropped dramatically since using the TM1000."

**Michael Burgin, Head Greenkeeper –
Normanby Hall Golf Club**

Versatile Variseeder key to overseeding

The versatile SISIS Variseeder 1300 has been key to overseeding without disruption according to Simon Marshall, Head Greenkeeper at Wishaw Golf Club.

Simon has been working at the golf club in the West Midlands for an impressive 26 years. It could, however, have been a vastly different story as rather interestingly, he used to be a candle maker and delivered them to churches all over the country. As a keen golfer, and already a member of Wishaw Golf Club, there was only one job he wanted.

"I have been a member at Wishaw since the age of 27 and I was so keen to get into greenkeeping that I spent the first summer helping out around the course, raking bunkers, cutting tees, and slowly learning the business."

His willingness and work ethic were rewarded when he was offered a full-time role at the 18-hole parkland course. Simon is now the Head Greenkeeper, and even though he admits that there is still a lot of work to do, the course is progressing nicely.

He explained that one such improvement was to start to incorporate more bent grass into the greens and to do this they needed to look at new equipment.

"Our aim is to try and get as much bent grass into the greens as possible and we thought that we could really do with a seeder," he said. "The first one we tried was a slit seeder but it just caused too much disruption. It was at this point that our attentions turned to the SISIS Variseeder.

"I spoke to a few other greenkeepers from other courses, and they all recommended the Variseeder – it just seemed a no-brainer."

The SISIS Variseeder is a versatile easy to use tractor mounted seeder with a variable seeding rate ideal for golf course maintenance and for use on lawns and amenity areas. It has a fast work rate, is low maintenance with few wearing parts and enables overseeding to be undertaken without taking ground out of play. Complete with a studded roller, the Variseeder prepares the seedbed by creating thousands of little "plant pots" to receive the seed without linear grooves that can disturb play.

"I like the fact that the Variseeder is light and very easy to use," said Simon.

"We are quite a wet course in the winter and our tees experience a lot of wear. Therefore, the lighter the machine the better and the Variseeder is brilliant in that respect.

"Its versatility is its best feature. We overseed with it three times a year on the greens, overseed on the tees as much as we can, and the surrounds too. I also like how you can use it with different types of seed. If you can buy one machine that can do multiple jobs, then it is a bonus in my opinion."

"I spoke to a few other greenkeepers from other courses, and they all recommended the Variseeder – it just seemed a no-brainer."

Pedestrian Scarifier

Auto Rotorake MK5

Easy to use scarifiers for maximum thatch control and removal

SISIS pedestrian scarifiers use contra-rotating reels for a clean consistent performance, perfect for fine turf surfaces.

Ideal for:

Bowls, Croquet, Tennis | Cricket | Golf | Lawns |
Local Authority & Contractors

Lightweight and easy to manoeuvre, this pedestrian scarifier has been specifically designed to allow a range of interchangeable reels to be used for all year round maintenance. Maximum thatch control and removal helps to reduce the risk of disease, encourage 'up right' grass growth and a 'true' playing surface.

Unique features:

- Contra rotating reels with specially designed tipped blades for a clean consistent performance
- Quick change reels for thatch control and removal all year round and other essential maintenance tasks
- User friendly operator presence controls designed for maximum operator safety
- Micro depth adjustment control positioned on the handle for easy use
- Incorporate independent drive to the wheels and reel for effortless performance
- Slick tyres and full differential ensure ease of turning and minimal surface marking.

MODEL:	AUTO ROTORAKE MK5 POWER UNIT
Code:	FS1052
Working width:	500mm (20")
Engine:	GX160 Honda Engine

For details of reels go to Page 11.
FULL SPECIFICATION AVAILABLE ON www.sisis.com

SISIS Contra – Rotation Principle:

The Rotorake principle incorporates a series of blades rotating at high speed in the opposite direction to that of the conventional cylinder mower. The blades therefore cut upwards, continuously taking grass fibre away from the surface rather than pushing it into the surface of the turf. This also ensures that the machine is held to the ground and a regular working depth maintained.

Pedestrian Scarifier

Rotorake 600HD & 600HDX

Heavy duty scarifier and linear aerator recommended by professionals

Ideal for:

Bowls, Croquet, Tennis | Cricket | Golf | Lawns |
Local Authority & Contractors

MODEL:	ROTORAKE 600HD	ROTORAKE 600HDX
Code:	FS1246	FS1279
Working width:	600mm (24")	600mm (24")
Engine:	Honda GX390	16hp V-twin engine
Working depth:	30mm – with option to go deeper	30mm – with option to go deeper

600HDX does not incorporate a collection box.

For details of reels go to Page 11.

FULL SPECIFICATION AVAILABLE ON www.sisis.com

These heavy duty scarifiers are equally at home when used for regular routine use at a shallow setting or a deeper setting when required. They also contribute to aeration and compaction relief by cutting clean, continuous slits to assist water and air absorption. The 600HDX is ideal for use on tough warm season grass species.

Unique features:

- Contra rotating reels with specially designed tipped blades for a clean consistent performance
- Quick change reels for ultimate thatch control and removal all year round
- User friendly operator presence controls designed for maximum operator safety
- 6 forward speeds for efficiency under varying conditions and depth
- Reverse gear for manoeuvrability
- Incorporates independent drive to the wheels and reel

Tractor Mounted Scarifier

Rotorake TM1000

**Combined scarification
and linear aeration with
heavy duty power**

Ideal for:

Football, Hockey, Rugby | Cricket | Tennis | Golf | Lawns |
Local Authority & Contractors

A specially designed tractor mounted unit with a choice of four quick release interchangeable reels to aid the removal and control of thatch and help to reduce standing surface water by improving water infiltration. Features include a contra rotating reel for a clean consistent performance with a selection of various blades to suit key tasks.

The weight of the collection box and material is carried by the main frame on the front roller and independent from the reel, so when in use the additional weight does not force the reel to scarify deeper than has been set.

Unique features:

- Floating unit to follow ground contours
- Fast ground coverage
- Interchangeable reels and optional variable spacing allows key tasks such as scarifying, linear aeration, verticutting and brushing to be carried out
- Quick release reel system
- No tool depth setting for fast, simple adjustment
- Contra rotating reels ensure a clean consistent groove
- Standard Cat. 1, 3 point linkage
- When used without collection box, scarifying unit can be off set so that the wheels do not run over the removed thatch
- Optional hydraulic tipping kit

Contra rotating reel ensuring excellent performance

Easy to use manual tip system

Large capacity collection box, shown with optional hydraulic tip kit

MODEL:	ROTORAKE TM1000
Code:	FS1258
Working width:	1000mm (40")
Tractor power requirement:	18-20hp minimum
Working depth:	50mm (2") max (with scarifying reel)

**Includes collection box.
For details of reels see below.**

FULL SPECIFICATION AVAILABLE ON www.sisis.com

Rotorake Easy to Change Reels

Reels

1mm light scarifying/verticutting reel FS1260

1mm replaceable, wear resistant tungsten tipped blades. Can be used throughout the season.

2mm scarifying/thatch removal reel FS1259

2mm replaceable, wear resistant tungsten tipped blades. Ideal for pre and post playing season renovation work.

3mm scarifying/thatch removal reel FS1261

3mm replaceable, wear resistant tungsten tipped blades. Ideal for pre and post playing season renovation work.

Reels

Brush reel FS1263

Used throughout the year for debris collection and clean-up. Also used prior to mowing to stand grasses up and improve cut quality.

Faze-Mo reel FS1262

Aggressive removal of thatch layer and surface levelling at the end of season.

Optional Extras

Hydraulic Tipping Kit FS1061

Tractor Mounted Scarifier

Veemo MK2 and Veemo HD

Minimum surface disturbance
with maximum thatch removal –
designed for large areas

Ideal for:

Football, Hockey, Rugby | Cricket | Golf | Local Authority & Contractors

Close-up of blades

Purpose designed, triple mounted hydraulic driven scarifiers using strong cutting blades for maximum thatch removal and minimum surface disturbance.

The three independently floating heads follow ground contours closely without scalping.

Depth of cut is infinitely variable by means of a locking micro-adjuster on each unit. A choice of 1mm or 2mm tungsten tipped blades are available to carry out scarification and verticutting requirements.

The Veemo HD is ideal for warm season grass species.

Unique features:

- 3 fully floating units mounted on a chassis with support wheels to follow ground contours
- Efficient hydraulic system with large volume tank
- Direct hydraulic motor drive to each reel for maximum power transmission without belts
- Tool free depth setting by micro control on each unit means fast, simple adjustment
- Standard Cat.1, 3 point linkage for fast, easy coupling to tractor unit
- Integral heavy duty oil cooler for all climate conditions
- Fast ground coverage saving time and money

Micro adjusters for depth setting

Direct Drive to reel shaft via hydraulic motor

Tungsten tipped 'hook' blades for durability

Integral heavy duty Oil cooler

MODEL: VEEMO MK2 INCLUDING OIL COOLER

Code: **FS1014**

Working width: 2000mm (80")

Tractor power requirement: 30hp minimum

Includes 2mm tungsten tipped 'hook' blades reel.

FULL SPECIFICATION AVAILABLE ON www.sisis.com

Also available with 'saw-tooth' blades upon request

MODEL: VEEMO MK2 WITHOUT OIL COOLER

Code: **FS1255**

Working width: 2000mm (80")

Tractor power requirement: 30hp minimum

Includes 2mm tungsten tipped 'hook' blades reel.

FULL SPECIFICATION AVAILABLE ON www.sisis.com

Also available with 'saw-tooth' blades upon request

MODEL: VEEMO HD INCLUDING TWIN OIL COOLERS

Code: **FS1287**

Working width: 2000mm (80")

Tractor power requirement: 30hp minimum

Includes 2mm tungsten tipped 'saw tooth' blades reel.

FULL SPECIFICATION AVAILABLE ON www.sisis.com

Pedestrian Aerators

Helping to keep grass in a healthy condition

By the pioneers of aeration techniques.

Ideal for:

Bowls, Croquet, Tennis | Cricket | Golf | Lawns | Local Authority & Contractors

Image shows Dart model

Operator friendly and easy to manoeuvre range of vertical and drum type aerators. These machines are ideal for relieving soil compaction, allowing water and oxygen to the root zone, improving drainage and helping the turf become drought resistant. The interchangeable tines allow for a variety of aeration methods to be

carried out on a regular basis with minimal surface disturbance. Ideal during and out of season.

Unique features:

- Vertical penetration and with drawl with minimal surface disturbance
- 'Easy lift system' for effortless turning and transport
- Selection of interchangeable tines

Tractor Mounted Aerators

Javelin and Javelin Aer-Aid 1500

Aeration with a difference

Ideal for:

Football, Hockey, Rugby | Cricket | Golf | Local Authority & Contractors

Image shows Javelin Aer-Aid complete with rear roller

The SISIS Javelin and Javelin Aer-Aid machines are specially designed tractor mounted vertical action aerators for use on both fine and outfield turf.

The machines can be used all year round due to the large selection of tines helping to break up compaction allowing water, air and nutrients to penetrate the root zone. Consistent use helps to produce a surface that is less affected by the adversities of weather conditions leaving minimal disturbance.

STRI trials demonstrated the Aer-Aid system:

- Significantly reduces surface and soil compaction
- Increased water infiltration rates
- Manages soil based issues
- Enhances root development
- Helps to limit turf damage caused by disease when integrated in a management programme

Quick, single lever tine depth setting for easy adjustment

The Aer-Aid system injects air directly into the root zone speeding up the aeration process, moving air uniformly throughout the root zone for complete aeration – not just where the tines have penetrated.

The cam trigger mechanism ensures that the air is always expelled at the bottom of the tine penetration enabling treatment to be targeted precisely.

"A breath of fresh air"

Unique features:

- Fast forward speed for excellent productivity
- Quiet in operation
- When working at 75mm (3") spacing air is introduced at a rate of 88 litres (3cu.ft) per minute
- The air injection tines are specially designed to use the maximum air available from the compressor which produces clean, fresh air at a constant rate
- Minimal maintenance required due to bearings fully sealed and no grease nipples in the drive system

MODEL:	JAVELIN AER-AID
Code:	FS1066
Action:	Vertical Air Injection
Working width:	1500mm (60")
Working depth:	127mm (5")
Tractor power requirement:	30hp minimum.

Includes set of 10 air/non-air tines and rear pressure roller

Tractor Mounted Aerators

Multitiners

Helping to restore and maintain playing surfaces all year round

Ideal for:

Football, Hockey, Rugby | Cricket | Golf | Local Authority & Contractors

Image shows Multitiner 1.8m

Simple design with low maintenance, the Multitiners are drum type tractor mounted aerators for use on fine turf surfaces and sports fields and are well suited to performing a range of various aeration methods such as solid, chisel and hollow tining. Fast and effective, these aerators will leave minimal surface disturbance.

Unique features:

- Choice of interchangeable tines for different aeration methods
- Quick release guard cover
- No 'tools required' quick release tines
- Rear spring loaded pressure rollers to follow undulations (1.2 version only)
- Large rear pressure roller that can be used for extra weight in hard conditions (1.8 version only)
- Tine drums have independent rotation
- 3 point linkage for use on most compact tractors

MODEL:	MULTITINER 1.2	MULTITINER 1.8

FULL SPECIFICATION AVAILABLE ON www.sisis.com

ROLASPIKE UNIQUE FEATURES:

- Can be fitted to the SISIS Singleplay, Twinplay, Tri-play or Quadraplay combination frames for easy attachment to any tractor

Pedestrian Slitter

Autoslit

Easy to use slitter with minimal surface marking

Ideal for:

Football, Hockey, Rugby | Bowls, Croquet, Tennis | Golf |
Lawns | Local Authority & Contractors

A purpose built pedestrian deep slitter which is suitable for use on fine or outfield turf helping to reduce compaction and assist the percolation of surface water.

The deep clean slitting action cuts through the turf and the root zone leaving a thin slit on the surface and minimal surface disturbance.

These slits encourage strong, healthy root growth of the grass plants, improving tolerance to drought conditions and promoting more rapid recovery after damage in play.

Easy to use the Autoslit incorporates a rear smoothing roller and uses a cantilever system to lift the machine out of operation.

Unique features:

- Choice of interchangeable slitting tines to suit different ground conditions
- The angle of the tines and spiral design of tine shaft assist penetration giving maximum underground cultivation with minimum surface disturbance
- Tine plates have a wide rim to reduce marking in soft or undulating conditions
- Safety guard is quickly removed for easy tine change
- For ease of use, and to comply with EU lifting regulations, the patented design uses a cantilever system to lift the machine out of work
- Incorporates rear smoothing roller
- Fine turf sharpened tines included as standard

Pivoted smooth rear rollers for ease of movement and a 'finishing touch' to the slitting process

The cantilever system for lifting the machine out of operation

User friendly operator controls

MODEL:	AUTOSLIT
Code:	FS0819
Working width:	900mm (36")
Working depth:	150mm (6")
Engine:	Honda GX160

OPTIONAL TINES*	
Optional tines (24 per unit)	
152mm heavy duty/outfield	D7493
152mm sharpened fine turf	D6951

***See page 42 for tine selection**

Tractor Mounted Deep Slitters

Optimum aeration for maximum health

Deep slitting aerators work... with minimal surface disturbance for the ultimate finish.

Ideal for:

Football, Hockey, Rugby | Cricket | Golf | Local Authority & Contractors

Image shows 1.8m Maxislit

Built to last, a range of tractor mounted deep slitters for both outfield and fine turf.

Different working widths and varying maximum depths allow a model to be selected to suit any tractor and most applications.

These machines are simple in design and low maintenance. Their thin sharp blades cut through the turf and root zone leaving only a slit on the surface but giving deep optimum sub soil disturbance.

Regular slitting encourages strong, healthy root growth of the grass plants, improving tolerance to drought conditions and promoting more rapid recovery after damage in play.

Unique features:

- Choice of interchangeable slitting tines to suit different ground conditions (Multislit versions only)
- The angle of the tines and spiral design of tine shaft assist penetration giving maximum underground cultivation with minimum surface disturbance
- Tine plates have a wide rim to reduce marking in soft or undulating conditions
- Rollers fitted as standard to all models
- Strong shatterproof boron steel tines

FULL SPECIFICATION AVAILABLE ON www.sisis.com

TOWED IMPLEMENT FRAMES

Ideal for towing behind small compact tractors when hydraulic lift is not available. The system can use implements singly or in pairs by using the optional extension arms.

Towed implement frame with extension arms suitable for 2 implements

TOWED SINGLE IMPLEMENT FRAME – MANUAL LIFT

Code: **FS1118**

TOWED SINGLE IMPLEMENT FRAME – ELECTRIC LIFT

Code: **FS1238**

TWIN IMPLEMENT EXTENSION ARMS

Code: **FS1123**

For details of implements go to page 28

FULL SPECIFICATION AVAILABLE ON www.sisis.com

Easy to Attach Combination Implements

IMPLEMENTS	1.2m	1.8m	2.4m	
Deep Slitter Relieves compaction helping to assist in the absorption of water, air and nutrients into the root zone with minimal surface disturbance. Ideal for pre-season and end of season maintenance (for towed implement frame only).	FS1162	n/a	n/a	
Spiker Slitter Fast method of surface aeration allowing air and water to percolate into the root zone. Ideal for use during the playing season and before fertilizer applications and irrigation.	FS0561	FS0764	FS0774	
Rolaspikes Ideal for surface aeration during the playing season allowing water and air into the root zone and integrating fertilizer into the surface. Also useful as part of an overseeding programme.	FS1271	FS1169	FS1267	
Straight Brush Used for standing grasses up, removing excess dew, enhancing presentation and brushing in dressings. Ideal on natural grass and hard porous areas. <i>*See note below table</i>	FS0865B	FS0765B	FS0775B	
Zig Zag Brush Angled brush sections increase the brushing intensity. Ideal for removing dew, standing grasses up, working in top dressing and improving presentation. Ideal on natural grass and hard porous areas. <i>*See note below table</i>	n/a	FS0869B	FS0516B	
Flexicomb Ideal for standing up grasses and grooming, the easily adjusted crossbar increases or decreases the Flexicombs intensity. <i>*See note below table</i>	FS1163	FS1134	FS1277	
Intermediate Rake 4mm diameter tines. Ideal for regular use on hard porous surfaces, gravel paths and running tracks.	FS1270	FS0759	FS1268	
Tilth Rake 5.5mm diameter tines. Ideal for compacted hard porous surfaces, gravel paths and running tracks.	FS1269	FS0760	FS1266	
Spring Tine Grooming Rake 7mm diameter spring tines for grooming and raking. Ideal for standing grasses up to improve presentation and remove thatch, useful for creating a tilth on worn areas. Also suitable for use on hard porous surfaces. <i>*See note below table</i>	FS1148	FS0761	FS0771	
Fine Grooming Rake 5mm diameter spring tines for grooming and raking. Ideal for standing grasses up to improve presentation and remove thatch, useful for creating a tilth on worn areas. Also suitable for use on hard porous surfaces. <i>*See note below table</i>	FS1272	FS1075	FS1076	
Levelling Lute Ideal for levelling and grading hard porous surfaces.	n/a	FS0762	FS0772	
Roller Ideal for light rolling of all surfaces and enhancing presentation. Used on natural grass and hard porous areas.	FS0863	FS0763	FS0773	
Grader Plate Ideal for levelling greyhound tracks or other sand based surfaces leaving a lightly compacted polished finish.	n/a	FS1110	FS1109	

**Suitable for maintenance of synthetic surfaces – please contact SISIS for a copy of the SISIS synthetic product brochure.*

Popular Combinations

QUADRPLAY + SPIKER SLITTER + FINE GROOMING RAKE + ROLLER + BRUSH

Ideal for:
Football, Hockey, Rugby | Cricket

QUADRPLAY + FINE GROOMING RAKE + INTERMEDIATE RAKE + GRADER PLATE

Ideal for:
Greyhound Race Tracks

TWINPLAY + ZIG ZAG BRUSH + BRUSH

Ideal for:
Football, Rugby | Golf

Tractor Mounted Seeder

Variseeder 1300

High build quality, efficient output with low maintenance

Ideal for:

Football, Hockey, Rugby | Cricket | Golf | Local Authority & Contractors

Standard cat 1, 3 point linkage for easy fitting to any tractor

A compact and versatile tractor mounted overseeder ideal for renovation and repair work.

The studded roller prepares the seedbed by creating thousands of little "plant pots" to receive the seed without linear grooves that can disturb play. Variable seed rates and options on discharge rollers allow different seed varieties to be introduced to the sward.

Unique features:

- Seeding rate is variable and is simple and accurate to set by Zero max box
- Fast work rate
- Overseeding carried out without taking ground out of play
- Studded roller creates seed bed
- Low maintenance with few wearing parts
- Integral weight bar
- Standard cat.1, 3 point linkage for easy fitting to any tractor
- Can be adapted for use with most common power units for golf and sports ground work

Zero Max Box for variable seed rates

Studded roller for minimal surface disturbance and creating the seedbed 'plant pots'

Transport trolley – storage trolley for ease of movement in the shed/workshop

Grooved discharge roller – two discharge roller options for pure bent, rye grass/fescue

MODEL:	VARISEEDER 1300	
Code:	FS1056	FS1245
Complete with:	Standard discharge roller	Ultra fine discharge roller
Working width:	1300mm (52")	1300mm (52")

FULL SPECIFICATION AVAILABLE ON www.sisis.com

Optional Extras

Ultra fine discharge roller (for pure bent seed only)
Code: **FS1059**

Standard discharge roller (for rye grass/fescue)
Code: **FS1057**

Tractor Mounted Sweepers

Enhance the aesthetic presentation of your pitch

Sweepers specially designed for large areas.

Ideal for:

Football, Hockey, Rugby | Cricket | Golf | Local Authority & Contractors

Image shows Litamina 1200

Collection and removal of surface debris is an important part of any maintenance programme. Whether it is following scarifying or core aeration or simply collecting leaves or litter, the process must be carried out without damaging the turf. Ideal for fine or outfield turf the SISIS range of easily adjustable tractor sweepers have spiral designed brushes that drive the debris into large capacity hoppers whilst following ground contours.

Unique features:

- Collects wide range of debris including leaves, pine needles, grass, thatch, cores, litter
- Spiral design brush for effective collection
- Ideally suited to follow ground contours
- "No tools" required simple brush adjustment
- Galvanised collection hopper for long life
- Large capacity hopper
- Standard cat 1.3 point linkage for simple connection

Tractor Mounted Brushes

Delivering an outstanding finish

Ideal for:

Football, Hockey, Rugby | Cricket | Golf | Local Authority & Contractors

Image shows Flexibrush

A range of tractor mounted brushes designed for fast effective brushing on large areas such as golf fairways and sports grounds. Ideal for brushing in top dressings, dew dispersal, striping for improved presentation and lifting grasses prior to cutting.

The brush sections on the Flexibrush model float to follow ground contours with the outer sections folding

hydraulically for ease of transport and storage.

The Varibrush model has a multiple brushing action to allow maintenance to be completed with fewer passes therefore reducing compaction.

A choice of three mounting options are available for the Varibrush ensuring it can be used on a variety of vehicles.

Flexibrush unique features:

- Brush sections float to follow ground contours
- Outer sections fold for transport and storage
- Supplied with stand and castors for easy movement when storing
- 3 point linkage

MODEL: FLEXIBRUSH

Code: **FS1033**

Working width: 5350mm (214")

Min Tractor requirement: 18hp

FULL SPECIFICATION AVAILABLE ON www.sisis.com

Flexibrush

Varibrush

Adjustable wheels (Varibrush)

Varibrush unique features:

- Brush frame is reversible to allow brush wear
- Adjustable drawbar for towing height and length
- Easy to handle and attach
- Multiple action means fewer passes and therefore reduced compaction

MODEL: VARIBRUSH
Options Code

With 3 point linkage mounting frame **FS1029B**

With manual lift towing frame & ball hitch **FS1024B**

With electric lift towing frame & ball hitch **FS1027B**

Units are complete with wheels

Working width: 1850mm (74")

Min Tractor requirement: 18hp mounted – 12hp towed

FULL SPECIFICATION AVAILABLE ON www.sisis.com

Towed Interchangeable Roller or Brush Unit

Flexi400

Fast and effective coverage of golf fairways and sports grounds

Ideal for:

Football, Hockey, Rugby | Cricket | Golf |
Local Authority & Contractors

An interchangeable unit which has been specifically designed for fast and effective coverage on large areas such as golf fairways and sports grounds.

The unit has seven fully floating heads which allows it to follow ground contours.

Fitted with either roller or brush heads, it is ideal for the removal of dew, striping for improved presentation, lifting grasses prior to cutting, or brushing in top dressings.

Unique features:

- Fast and effective ground coverage
- Easy to handle and attach
- Seven floating heads
- Easy to store and transport
- Attachable by either 50mm ball hitch or clevis pin

Arms in folded position for ease of storage

Image shows Flexi400 with rollers

Attached and ready for action

MODEL:	FLEXI400
Code:	FS1273
Description:	Towed unit with rollers
Working width:	4000mm (158")
Power unit requirement:	15hp minimum

FULL SPECIFICATION AVAILABLE ON www.sisis.com

Optional Extras

Brush heads **800230**

Optional brush head

Tractor Mounted Spreader & Top Dresser

Powaspred

Ideal for:

Football, Hockey, Rugby | Cricket | Golf | Local Authority & Contractors

The Powaspred will spread most free flowing materials including sand, loam, rock salt, rubber crumb and hard porous dressings at the desired rate with an even consistent spread.

Unique features:

- Infinitely variable spreading rates
- Oscillating base plate to reduce bridging
- Rotating brush at point of discharge to ensure even spread
- 4 tyres on a twin axle to avoid marking and to spread load on fine turf

Close up of the rotating brush and oscillating plate

MODEL:	POWASPRED
Code:	FS0780
Operating width:	1200mm (48")
Min tractor requirement:	15hp minimum

FULL SPECIFICATION AVAILABLE ON www.sisis.com

Visit www.sisis.com to see the Powaspred in action

Hand Tools:

Pedestrian Spreader & Top Dresser

Truspred

Ideal for:

Bowls, Croquet, Tennis | Cricket | Golf | Lawns

A versatile hand operated spreader and top dresser for the accurate even application of grass seed or top dressing material.

Particularly useful for applying top dressing to small areas such as cricket squares, bowling greens, golf greens and tees and lawns.

Unique features:

- Simple to set spreading rates
- Ribbed rubber conveyor belt for accurate placement
- Carrier wheels permit spread right to the edge of bowling greens

MODEL: TRUSPRED

Code: **FS1174**

Working width: 900mm (36")

**FULL SPECIFICATION AVAILABLE ON
www.sisis.com**

**Please note a carriage charge will be applied to hand tool equipment*

Image shows Truspred

Dragmats

Ideal for rubbing in dressings and routine surface renovation.

MODEL:	HAND PULLED	HAND PULLED/TOWED	TOWED
Code:	FS1036	FS1242	FS1037
Working width:	1.35m wide x 1.2m	1.8m wide x 1.2m	2.7m wide x 1.2m

FULL SPECIFICATION AVAILABLE ON www.sisis.com

Trulute

Reversible levelling grid with different profiles for use on turf, shale and gravel surfaces. One side has smooth edges for spreading top dressing and levelling whilst the other side has sharp edges for working in top dressings and levelling back high spots. Folding handle for ease of transportation and storage.

MODEL:	TRULUTE
Code:	FS0302
Working width:	600mm (24")

FULL SPECIFICATION AVAILABLE ON www.sisis.com

**Please note a carriage charge will be applied to hand tool equipment*

Aerdrain Fork

Simple but effective aeration fork with interchangeable tines for year round use.

MODEL:	AERDRAIN FORK (LESS TINES)	96MM LONG PENCIL TINES (SET OF 5)	127MM LONG HOLLOW TINES (SET OF 3)
Code:	FS1144	SETX5-D1534	SETX3-D1535

FULL SPECIFICATION AVAILABLE ON www.sisis.com

Trulevel Roller

Ideal bowling green roller which can be pulled or pushed with ease to firm the soil without compaction. Overriding action on slight hollows allows areas to be firmly rolled whilst low areas are left so that the playing surface is progressively levelled. Outer rollers can be raised concentrating the weight on the centre roller if desired.

MODEL:	TRULEVEL (120KG ROLLER)	ADDITIONAL WEIGHTS (SET OF 2)
Code:	FS0801	FS1257

Working width: 900mm (36")

FULL SPECIFICATION AVAILABLE ON www.sisis.com

Bray Hand Tools

Ideal for overseeding and aerating small areas on bowling greens, tennis courts, golf greens, tees and ornamental lawns.

- Interchangeable reels between slotter and spiker
- Encourages rapid germination and stronger growth
- No loss of play and no top dressing required.

MODEL:	HAND SLOTTER	ADDITIONAL SLOTTER REEL	HAND SPIKER	ADDITIONAL SPIKER REEL
Code:	BS002	BS005	BS004	BS003
Working width:	250mm (10")	250mm (10")	250mm (10")	250mm (10")

FULL SPECIFICATION AVAILABLE ON www.sisis.com

Ferret

Ideal tool for roughing up small bare areas such as foot holes on a cricket square where ongoing repairs are required throughout the year.

The tool incorporates an offset star wheel to create a tilth.

Folding handle for ease of transportation and storage.

MODEL: FERRET
Code: FS0826
Working width: 250mm (10")

FULL SPECIFICATION AVAILABLE ON www.sisis.com

Dragbrush

Heavy duty dragbrush for brushing in top dressing, removal of dew and for brushing and levelling hard porous areas.

MODEL: DRAGBRUSH
Code: FS1166 FS1248
Working width: 1800mm 2400mm
(1.8m/72") (2.4m/96")

FULL SPECIFICATION AVAILABLE ON www.sisis.com

Combirake

Simple to use combined rake and brush for use on small turf areas. Downward pressure is applied by gentle pressure on the handles. Folding handle for ease of transportation and storage.

MODEL: COMBIRAKE
Code: FS0932
Working width: 690mm (28") rake
910mm (36") brush

FULL SPECIFICATION AVAILABLE ON www.sisis.com

Choosing the correct tine – a basic guide

	When to use:	SISIS Products:	Max Depth	External Dia
Pencil				
	Ideal for use on fine turf during the playing season. Will help to relieve compaction with minimal surface disruption.	Dart Supaturfman Javelin Aer-Aid Javelin Multitiner 1.2 Multitiner 1.8 Aerdrain Fork	100mm 100mm 127mm 127mm 67mm 67mm 96mm	7mm 7mm 7mm 7mm 7mm 7mm 7mm
Solid				
	A good, general purpose tine suitable for fine turf & outfield use. Can be used throughout the year and is popular for use during spring & autumn renovations. Gaining knowledge from the experts

The Dennis and SISIS education seminars are popular events hosted at clubs and facilities across the UK and overseas. Attending delegates receive a wealth of practical and theoretical insight from our carefully chosen expert speakers and the seminars represent a unique opportunity to share knowledge, experience and best practice.

Seminar programs focus on specific sports surfaces. A wide range of topics are covered including machinery maintenance, fertilizers, top dressing, seeds and disease. The Q&A sessions at the end of the day gives everyone an opportunity to ask their questions.

"You are never too old and never too experienced to learn something new, there are always new techniques to discover. That could be through the practical demonstrations, through the talks or even by chatting to your fellow grounds staff because you find that you really do learn from one another. An event like this is a fantastic way to develop those networks and get to know other people who are having the same issues as you."

Alex Vickers – Turf Consultant

Contact Marketing on 01332 824777 for details of our next series of seminars

"90 years of experience have taught us many things – including that you don't get to be the best overnight.

Like the world class sportsmen who play on SISIS maintained pitches demonstrate, it takes skill, dedication and a willingness to learn to reach and stay at the top of the game."

A helping hand from Team SISIS

Access to all the information you need

The SISIS website is a constantly evolving source of useful and practical information for SISIS users. You can watch videos of machines in action, learn valuable tips about turf maintenance and download operating manuals on all SISIS products at your convenience – any time, any day.

Experience our excellent network of dealers

The dealerships that represent SISIS products are carefully selected to ensure customers receive first class professional support including machine service, spare parts, technical support and product demonstrations. Whatever you need, our dealers will always be there to help.

Next day spare parts

At SISIS we understand the importance of reducing machine downtime so we carry a vast stock of spare parts, all of which can be dispatched next day delivery through our specialist dealer network.

In addition, our online resource of operator manuals now makes it even easier to identify the correct part number.

We keep good company

SISIS supports industry associations through corporate membership, which include:

Built with experience

Creating the perfect looking turf is the ultimate aim of every groundsman, greenkeeper and gardener the world over.

Whether in preparation for a prestigious event at a national stadium or a leisurely Sunday afternoon at the local sports club, your turf's appearance is everyone's first impression.

The team at Dennis shares your pride in creating the best. That's why we are so passionate about the products we design, make and test at our Derbyshire factory. Every mower is hand built by experienced engineers, drawing on a long tradition of quality manufacturing and using only the best most reliable materials and components.
