

In addition to quality, 'efficiency' is one of the most important terms in the construction and maintenance of sports fields. From this philosophy is how we build our largest artificial grass brush. Doing your work quickly and well, that's what it's all about! The Brush is the largest brushing machine in the GKB range, and your field is just a few steps away from being brushed up. Thanks to the hydraulically folding side brushes, the Brush is easy to store and transport. The combination of a large working width and a small transport width makes the Brush the ideal brush for your artificial grass sports field.

We deliver the brush with two extra side-decks as standard. Accordingly, you are able to broaden the operating width to as much as 4 metres. Consequently, you can move to the next pitch twice as fast. Because you can hydraulically fold the side-decks, you can also quickly go from one pitch to another. Have you finished your operation? Then you can put the Brush in the park position to protect your brushes, ready for the next challenge.

The Brush essentially consists of a 2 meter wide frame, under which stiff brushes are mounted. Under the deck, the brushes are located at the front and rear, as well as mounted diagonally. The positioning and stiffness of the brushes has been designed in such a way that infill is distributed as effectively as possible and the appearance of the fibers meets your expectations.

THE WORKER IS KING

Brush Specifications:

Type	BR400
Working width	400 cm / 158"
Dimensions (L x W x H)	125 x 400 x 100 cm / 50 x 158 x 40"
Dimensions during transport (L x W x H)	125 x 215 x 145 cm / 50 x 85 x 57"
Weight	400 kg / 880 lbs
Power requirement	35 - 50 hp
Linkage	Standard three-point hitch cat I - II
Operating speed	0 - 8 km/h / 0 - 5 mph*
Comments	* The working speed depends entirely on the type of infill and the hardness of the infill.
